- **type** should be the product type. p.type_id
- **package** should be the product package. p.package_id
- **instance id** should be the insurance instance id. insurance_uuid

Response

Data Id	Meaning	Further Info
status	This data stands for approval status of the request.	Possible values are: **p**: Processing; **d**: Declined; and **a**: Approved.
note	This data may be present only when the value of **status** is **d**.	This data stands for the reason why the request was declined. This data should not be displayed unchecked to end-users, as it sometimes contains data you may not want to expose.
tmstmp	This data is present only when the value of **status** is **a**. This data stands for the time the insurance was approved.	This data is also what is considered as the commencement date of the insurance; the time of the submission of the request is not what is considered. This data takes the format **YYYY-MM-DD HH:MM:SS**.
